AMERICA'S SIGHT

ABOUT US.....**2026**

**TREELIMB VENTURES, LLC is an American Owned and Operated Company located in Northwest Ohio.**

Archery is a passion of the Treelimb Ventures LLC owners and employees. We know top archers demand complete **PERFECTION**. Perfection is what we provide with every one of our "Built in Ohio USA" products. We strive to source, assemble and build all our gear at home here in the great Buckeye state.

Our Sword Sights brand screams quality and dependability into every single product we hand build. We back and stand behind our products 100%. Sword sights are designed to stand up to the rigors of extreme hunting, and to the vibration of repetitive shots from today's demanding high speed bows. Combining innovative design with quality components and fiber optics paired by Sword's commitment to customer service; the **SWORD** sighting solution is clear.

Our Treelimb Bow Quivers brand are among the quietest and strongest quivers ever designed. These hand assembled "Built in Ohio USA" quivers are available in 3 or 5 arrow models. The Premium Series quivers feature a Quick Detach Mounting System and are equipped with a Tension Lock System for a quiet, secure attachment to the bow. Treelimb quivers accept both mechanical and fixed-blade broadheads. The built-in *Treelimb Hanger* allows bowhunters to hang the quivers next to them in the tree.

We simply pledge Sword Sights & Treelimb Quivers stand second to none in quality, dependability, and customer service.
